Invitation

Dear friends,

We have the pleasure to invite you to attend the IMAC 2014 which is going to be held in San Donato Milanese on the 28th of March 2014.

In this year's meeting, the focus will be on Clinical cases presented by Colleagues coming from many Centers; there will be the occasion to share ideas and experiences and plenty of time will be allocated for clinical discussions.

A mini course will be held at lunch time in order to give you all the information about when to ask for a CMR, what to look for and how to interpret the results.

A distinguished faculty of pediatric and adult cardiologists, surgeons, and other specialists

with expertise in medical treatment, diagnosis, nursing, cardiac imaging, and operative/postoperative care of adults with congenital heart disease has been assembled. The expertise necessary and the multidisciplinary strategies required for caring for congenital heart disease in the adult will be stressed in a manner that allows the participants to appreciate and plan for managing these patients in their practice.

The Program is designed for Cardiologists, Cardiac Surgeons, Electrophysiologists, Anaesthetists, General Practitioners, Psychologists, Junior Fellows and Nurses working with Adults with Congenital Heart Disease.

Massimo Chessa

Alessandro Giamberti
